"We Promise To Pay"

A Five Dollar bill issued by the United States is the Government's promise to pay that amount of money to the bearer without interest, but a Liberty Bond is the Government's promise to pay with interest at 31/2%.

With the certainty of getting your money back, you would not hesitate to loan to a friend even without interest, and no citizen of the United States has a better friend to-day than the Government of the United States. The Government desires the money to pay for services and goods to uphold the honor of the country and to preserve not only its democratic integrity, but the lives, liberty and happiness of those who make their home under the flag.

If the written word of the United States to repay the loan is not worth one hundred cents on the dollar, then the currency of the country is of questionable value, and your lands and goods are

worthless. There are those who place patriotism above the ties of family, but in so doing they keenly recognize that this noble allegiance to their country is a primal source of the health, wealth and happiness

Hudson Super-Sixes are entered in almost every race this year. Except for the championship events, they are entered by men whose only interest is to win prizes. These men are given no inducement to drive Hudsons, save the advantage the Super-Six gives in its performance. No price concessions are made them. They must make their car: suitable for racing at their own expense.

Ira Vail was the first driver to recognize the racing possibilities of the Super-Six. He bought a dealer's demonstrating car, removed the touring body, shortened the frame to racing length, mounted a racing body and in the 150-mile Metropolitan trophy race at Sheepshead Bay won second place and a \$2,000 prize.
